	Examiner JACOB CHEU	Art Unit 1641	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 4-11, drawn to a method of screening for therapeutic agent, with a special technical feature of detecting the binding of the compound to the PPARD peptide.

Group II, claim(s) 2, drawn to a method of screening for therapeutic agent, with a special technical feature of determining the activity of the PPARD peptide at a concentration of the test compound.

Group III, claim(s) 3, drawn to a method of screening for therapeutic agent, with a special technical feature of of determining the activity of the PPARD peptide at a concentration of a known regulator of PPARD peptide.

Group IV, claim(s) 12-17, drawn to drawn to a method of screening for therapeutic agent, with a special technical feature of detecting the binding of the test compound to the PPARD polynucleotide.

Group V, claim(s) 18, drawn to drawn to drawn to a method of screening for therapeutic agent, with a special technical feature of detecting the amount of PPARD peptide.

Group VI, claim(s) 21, drawn to a pharmaceutical composition which regulates the activity of the PPARD.

Group VII, claim(s) 22-23, drawn to a pharmaceutical composition comprising PPARD.

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

With respect to Group VII, Lambert III et al. teach a polypeptide PPARD (SEQ ID No. 6, WO 02064632; note Applicant listed in the specification, See Background of the invention, line 12). Also Lamert III teach screening modulators affecting PPARD activity (See claim 25). Furthermore, each group contains special technical feature not required by the other group.

Therefore, the invention of Group I-VII do not fulfill the requirement for unity of invention under Rule 13.1 PCT. Accordingly, the method of preparing or analyzing or are not so linked as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1641

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob Cheu whose telephone number is 571-272-0814. The examiner can normally be reached on 9:00-5:00.
